

PROFESSIONALLY
APPLIED
WART AND VERRUCA
TREATMENT*

Verrutop[®]

The power
of a drop

PAINLESS APPLICATION
QUICK AND EFFECTIVE
HIGH CLEARANCE RATE

VISIBLE
RESULTS FROM
THE FIRST
APPLICATION

Verrutop® is a new type of professional treatment for warts and verrucae*

- The nitri-zinc complex kills the wart tissue by breaking down its protein structure, leaving intact skin underneath
- No pain has been reported in clinical studies, either during application or afterwards
- Verrutop® is suitable for adults and children as young as 6 years

Immediate whitening after application of Verrutop®

After 15 days: complete remission

Before application of Verrutop®

After 15 days: complete remission

Poster presented by Galloni Ch. at the 27 th EADV Congress France 12-18 sept 2018 N= 766 warts

The tissue loses vitality

Wart colour changes

Mummification of the tissue

Cell renewal

Wart detaches

as a result of the chemical reaction

to white/yellowish

that darkens gradually

progressively under the protective layer

automatically a few days later

80% of patients saw clearance within 4 simple applications

*Verrutop should be applied by a healthcare professional
